Informazioni sul catalogo

Tutti i dati esposti in questo catalogo sono puramente indicativi e non impegnano in nessun modo la società la quale si riserva la possibilità di portare migliorie ai suoi prodotti in qualunque momento lo ritenga necessario. La società si riserva il diritto di proprietà del presente catalogo con la proibizione di riprodurlo o trasferirlo a terzi senza l'autorizzazione scritta.

Pesi teorici e distinte di taglio

Il peso dei profilati al metro lineare indicato è quello teorico, pertanto potrà subire variazioni in funzione di tolleranze di spessore e tipo di finitura.

La verniciatura potrà incidere anche se minimamente sulle fughe fra telaio ed anta comportando differenze sulle distinte di taglio realizzate tramite calcolo matematico.

Le differenze di taglio potranno aumentare in modo proporzionale al numero di ante per serramento. Si consiglia nei primi lavori o nei lavori di quantità importanti di realizzare un campione reale per controllare distinte di taglio ed idonee caratteristiche meccaniche.

Lunghezza barre

La lunghezza dei profilati commercializzati per la serie Persiana Global 32 è di 6500 mm.
